

Apart We Stand Together

Doss School and Community:

Be Smart, Live Well, *Stay Smart!*

- ✓ Coughing or sneezing can send infected droplets into the air. Always cough or sneeze into a tissue (or your elbow) and quickly wash your hands to reduce the risk of spreading the virus.

- ✓ COVID-19 lives in tiny droplets in the lungs of infected people even when they don't show symptoms. Staying farther apart from other people reduces the chance of breathing in the virus.

- ✓ CDC recommends you wear a mask in public where you can't avoid being near people, like in grocery stores, pharmacies and healthcare settings; see the notice at: <https://bit.ly/2V8o5Y2>.

Stay Smart: Send completed work to your teacher!

Enjoy a wonderful week! - Apart We Stand Together!
